#### **DETAILED ACTION**

### Claim Objections

1. Claim 6 is objected to because of the following informalities: Claim 6 may not depend on itself. Appropriate correction is required.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Nagai et al. (U.S. Patent No. 5,783,322).

In reference to claim 1 Nagai discloses in Figure 14 a semiconductor switch (70) comprising: two MOS transistors (FET11, FET12) that are coupled in a series arrangement (it is the examiner's interpretation of the claim that the two transistors are actually coupled in series and not anti-series), and a gate control circuit (12) that is coupled to both gates of the MOS transistors, the MOS transistors being embodied as N-channel MOS transistors, both drains of the MOS transistors being interconnected, and the gate control circuit (12) being coupled to the interconnected drains.

## Allowable Subject Matter

4. Claims 2-5 and 7-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claim 6 also would be

Application/Control Number: 10/532,922 Page 3

Art Unit: 2816

allowable if the objection to the dependency is overcome and it is rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: Claims 2-4 and 8 (when dependent on claim 2) would be allowable because the closest prior art of record fails to disclose a circuit as shown in Figure 2 wherein the switch further comprises a voltage limiting circuit (M3) in combination with the rest of the limitations of the base claims and any intervening claims. Claims 5 and 7 (when dependent on claim 5) would be allowable because the closest prior art of record fails to disclose a circuit as shown in Figure 2 wherein the gate control circuit (2) is arranged to perform a two phase gate pumping voltage multiplication operation in combination with the rest of the limitations of the base claims and any intervening claims. Claims 6 and 7 (when dependent on claim 6) would be allowable because the closest prior art of record fails to disclose a circuit as shown in Figure 2 wherein the gate control circuit (2) comprises a switched capacitor means in combination with the rest of the limitations of the base claims and any intervening claims. Claim 8 would be allowable because the closest prior art of record fails to disclose a circuit as shown in Figure 3 wherein the switch (1) is interconnected between two electrical circuits (4, 5) in combination with the rest of the limitations of the base claims and any intervening claims.

#### Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2816

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cassandra Cox whose telephone number is 571-272-1741. The examiner can normally be reached on Monday-Thursday from 7:00 AM to 4:30 PM and on alternate Fridays from 7:30 AM to 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Callahan can be reached on 571-272-1740. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
